

# Table Settings & BACKDROPS

Create a wedding of wonder with these big-day backdrops and top-notch table settings!

**HOBBY LOBBY**®

## Set In Tone

For this elegant and effortless table setting, cut your placemats and charger embellishments from a kraft paper roll (Art Supplies) and stencil on designs with a chalk pen. And for a bit of floral flair, finish with a mini arrangement—greens, bloom and twine.

Find this gold mercury glass votive in our Wedding Department and other candleholders in Home Decor.

Gather lavender, lamb's ear and white anemone picks and tie stems together with natural twine.

Adhere floral foam disc to wood slice, insert steel ring into foam (securing with hot glue), and arrange sprays and blossoms.

## Set Apart

Can't decide between silver or gold? Then don't! This fun and flashy gift table proves you can go for gold and have a silver lining all at once. The goblet- and cylinder-shaped candleholders come readymade with rhinestones—just add diamond filler and an LED candle.

Enliven clear candleholders with confetti-esque diamond filler.

Wrap box in silver ribbon and top with metal "gifts" decor. Then add eucalyptus, wedding garland, ranunculus and rose.

### **Green & Sheen**

Set the scene in green, starting with a moss mat table runner. Then arrange succulent picks, votives and glassware throughout for foresty fullness. And don't forget the best part: gold geometric terrariums—more succulent picks over layers of ceremony sand.

*Tip: Using hot glue, seal openings along terrarium's edges to prevent ceremony sand from leaking.*

Clip succulent, loop gold leaf garland around pick, and wrap around napkin.

## Lovely Lanterns

Want your wedding altar to amaze? Create an archway of luminous paper lanterns that's sure to attract attention. Lucky for you, these lanterns come in sets of three—small, medium and large. Secure them with jute and hang them alongside leafy branches for a little color.

## Tropical Tabletop

Whether you're having a destination wedding or just want it to feel like you are, a tropical aesthetic can be achieved by incorporating vibrant details, like exotic floral embellishments. Try adding orchids to your napkin rings and including monstera leaves for a Hawaiian vibe.

We placed orchids, protea and plumeria stems, a ranunculus bloom, monstera leaves and a cursive number pick all in this wooden wedding box.

The natural look of this wooden charger will complement your tropical florals.

Go for gold—and green—by backing this botanical wedding stationery with gold foil scrapbook paper.

### ***Paper Perfect***

Combine pretty pinks and gorgeous golds for a sweet and shiny wedding shower aesthetic you'll never forget. Simply decorate with your paper plates and napkins, all of which can be found in our Floral & Wedding Department.

Be golden with this glittery, heart-shaped cupcake pick and foil baking cup combo.

Tasty treats will look extra sweet on this pink paper plate with gold foil dots.

Brighten things up with this light-pink candleholder.

### **Floral Focus**

Looking to keep your table settings traditional? Arrange a floral focal piece like ours—heavy on the greens with a few pale-colored blooms. Pair it with a lace runner and gold-accented tableware (votives and fluted glasses) for eye-catching elegance.

Craft custom table markers out of cardstock (Paper Crafts) or find ones like this here in the Wedding Department.

Search in store and online for mercury glass decor, like this candleholder.

For a white-washed look, apply a mixture of water and acrylic paint to your wooden "Mr & Mrs" banner (Wedding Department).

### Fan Out ▲

After tying the knot, cut the cake in front of a backdrop that's a big blast of beauty. Think fun, flashy and flowery! Before hanging your paper fans (which can be cut smaller if desired), form a few tiny floral arrangements and adhere throughout. Psst... We used ranunculus picks, freesia sprays and roses.

### Bold Balloons ▶

Make archways, pillars or other dazzling designs out of balloons for a wedding reception that's poppin'. How to easily construct these classy creations? Use a balloon strip (from the Cards & Party Dept.) to secure your balloons and shape a pattern.

**Tip:** Fill gaps with smaller balloons secured with curling ribbon.
