

Cotton & Fur

FABRICS

LET'S HAVE FUN
WITH FABRICS!

HOBBY LOBBY®

BASKET BEAUTY

How do you make a fabric basket strong and durable? By adding fusible fleece batting in between the layers of fabric. The batting helps shape, stabilize and improve the sturdiness of the fabric. P.S. With our expansive selection of patterns, the hardest part of this project is picking out the fabrics.

This cactus cushion is on point (and on trend). We used polka dot fabric to imitate the spines on the leaves, giving our pillow a cute and quirky realism. We even went a step further by stitching fabric petals on top and prickles (ready-made tassel trim) along the edges of the leaves.

LOOKIN' SHARP

CUSHION CREATIONS

Dress up a reading nook or loft with custom floor cushions and personalized pillows made of cotton apparel fabrics! Find the perfect fillers—like poly foam pads and pillow inserts—here in our Fabrics & Sewing Department.

WRAP IT UP

Replace the time-consuming task of gift wrapping with something much quicker and more elegant! Simply cut desired fabric, place your gift in the center, and wrap the fabric over the gift. Tie the fabric in a knot or secure it with ribbon. P.S. Visit Paper Crafts for all gift tag essentials.

Don't sew?
Well, here you go!

IN THE BAG

For a look that's both fetching and fierce, combine wild fabrics (like leopard, zebra, cheetah and more) with matching faux leather (which also comes in many styles). The leather adds a fashionable texture to the bag, as well as durability to the base and handles.

Don't toss out leftover fabric and poly foam—make a matching bone-shaped pillow!

TOP DOG

Become the puppy parent of the year by crafting a comfy bed for your little four-legged family member! Start by cutting and stacking layers of poly foam (we went with three) to a desired size. Then wrap the layers with batting, stitch fabrics into a taut covering, and sew on faux leather handles and a name tag.

Fabrics can be fashionable and functional—and this hanging organizer is proof! Feel free to mix and match multiple colors and designs. Just establish a consistent look first. For example, we used fabrics with minimalistic patterns and muted colors throughout our organizer.

WALL WHIMSY

COZY UP

Faux fur poufs add warmth and comfort to a family room or home theater. Heavyweight but fluffy, faux fur complements animal prints and blends in nicely with shaggy rugs. What's inside our furry ottoman? Layers of poly foam—cut, stack and wrap them with quilt batting.

On The Cover:
Create a one-of-a-kind bedding set (custom comforters, pillows and more) with an array of coordinating fabrics!
