◀ SHINE ON

A 2D wall hanging is a great beginner project that's simple to make with stunning results. Lay out all the glass sections and solder them together at the joints to secure the scene in place. Then solder the outlines for a silvery finish.

After assembly, solder paper clips to the top corners for a pair of hanging hooks.

.....

▶ HOME FREE

Mix and match lots of different shades and textures into a single project to create a mosaic feel. This variety of styles always makes for one eye-catching suncatcher.

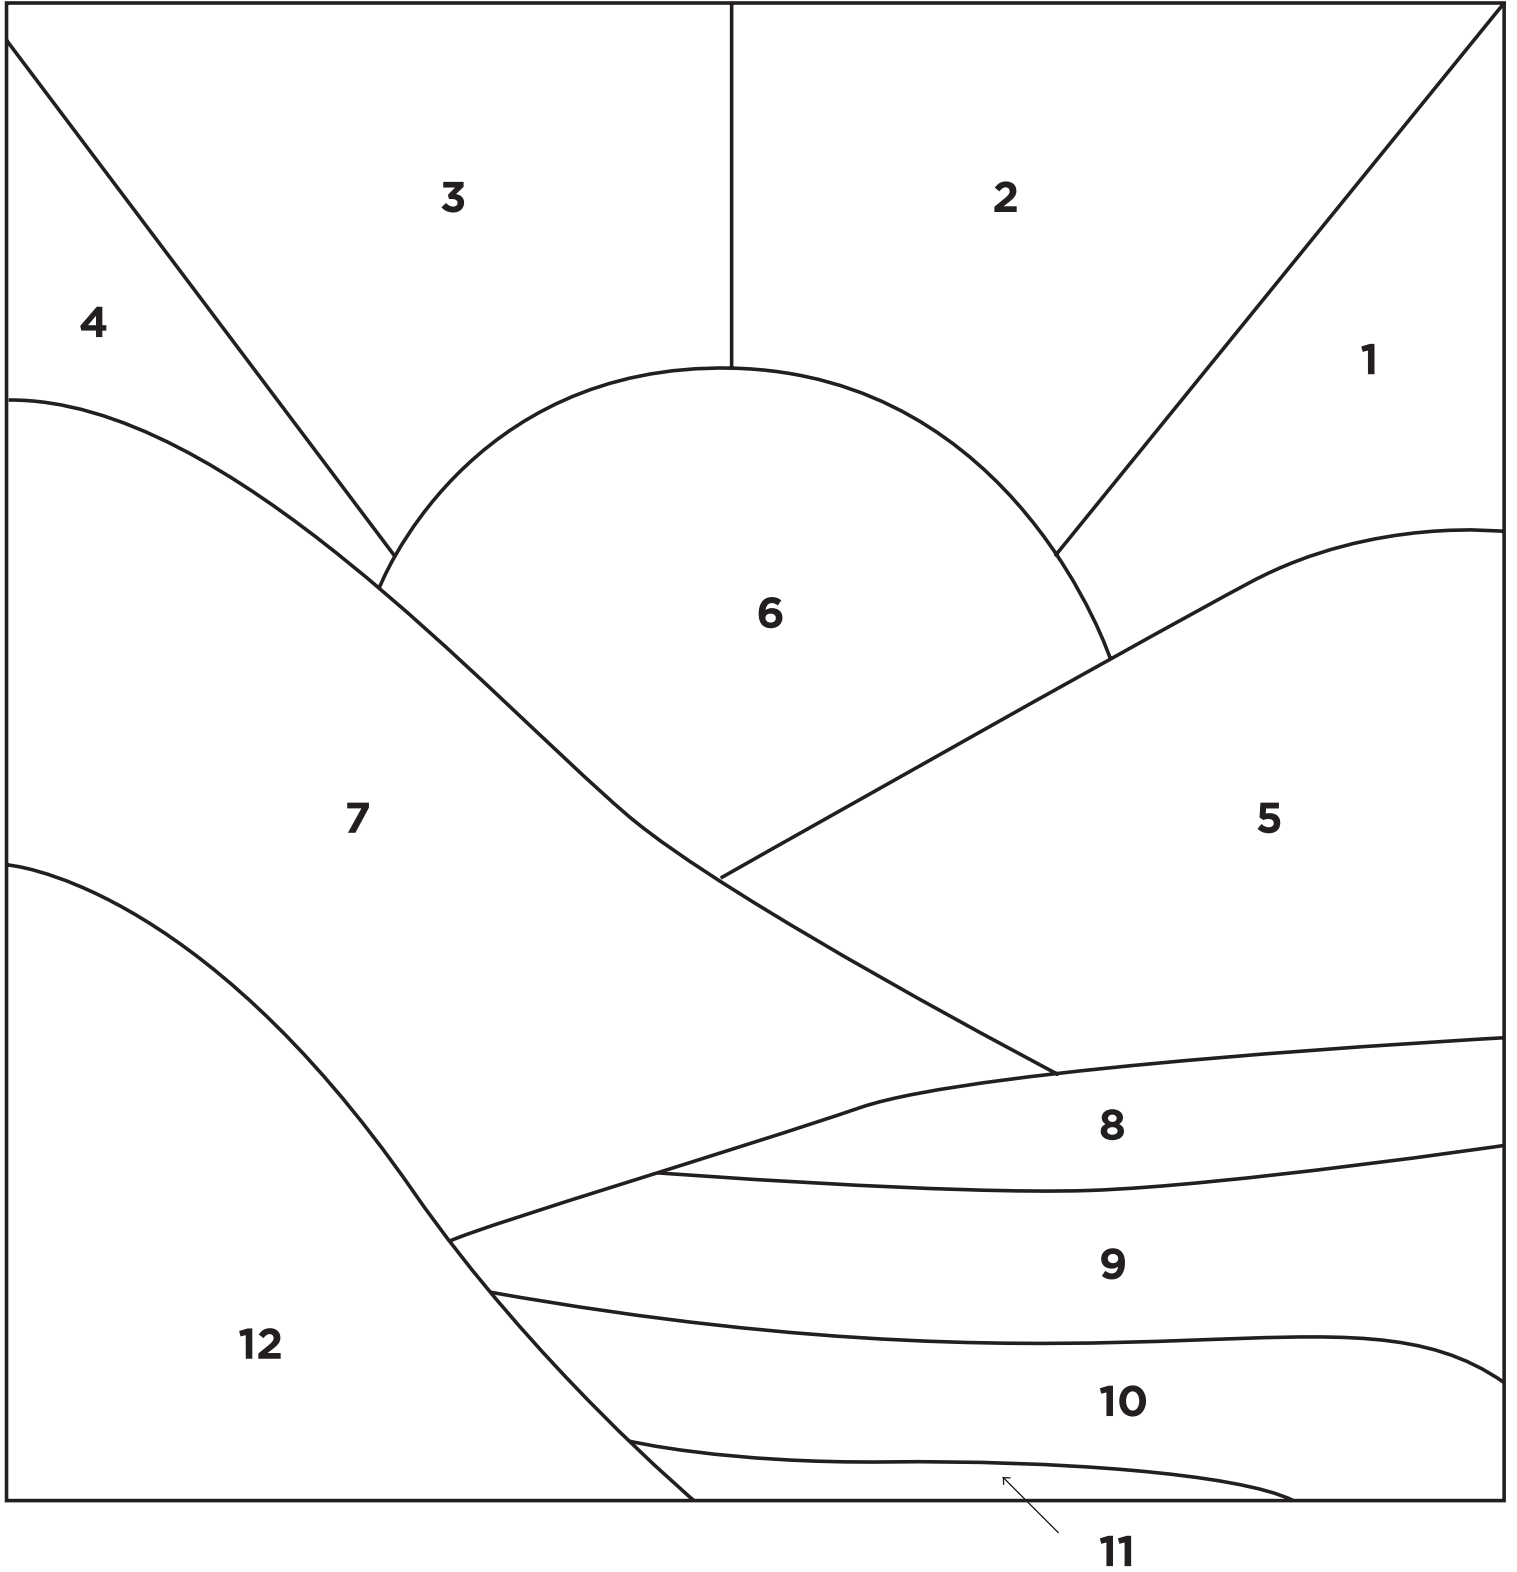

Just repeat colors throughout to give the design a cohesive look.

PLANT LIFE

Sprout new life into floral arrangements with a custom terrarium. Clear glass works best here, as it lets in plenty of sunlight while also keeping plants humid.

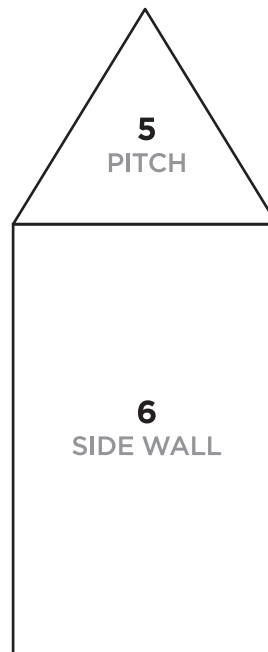

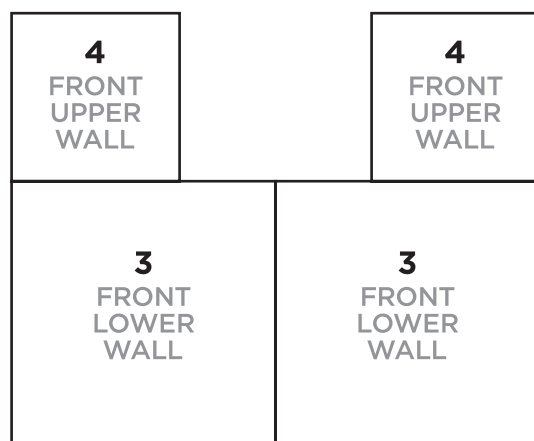

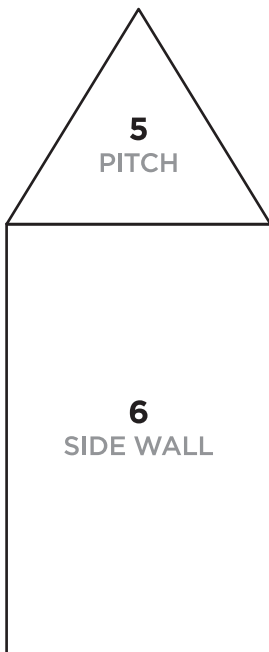

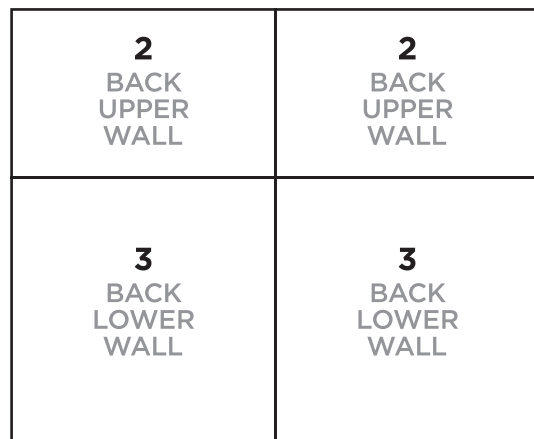

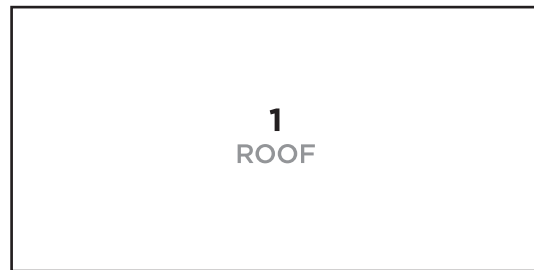

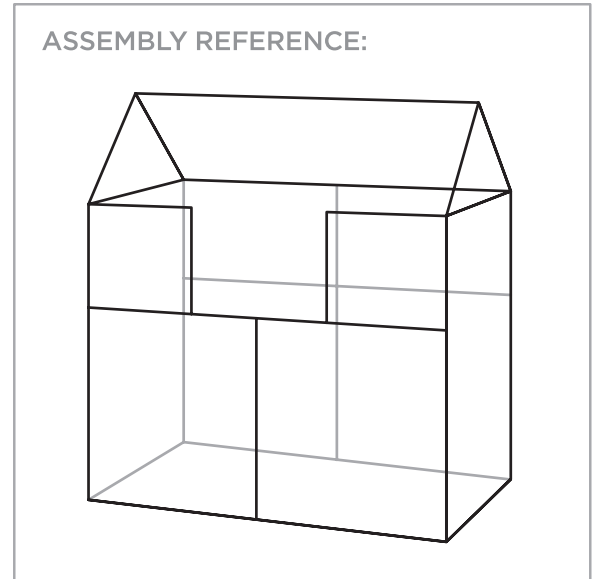

P.S. Remember to leave at least one section open at the top for watering.

SET SAIL

Give home decor a nautical vibe with this colorful creation. The classic paper boat design is a great first sculptural project because of its simple shapes and easy construction.

Tip: Make the sail first, then assemble the hull of the boat around it.

On the cover:

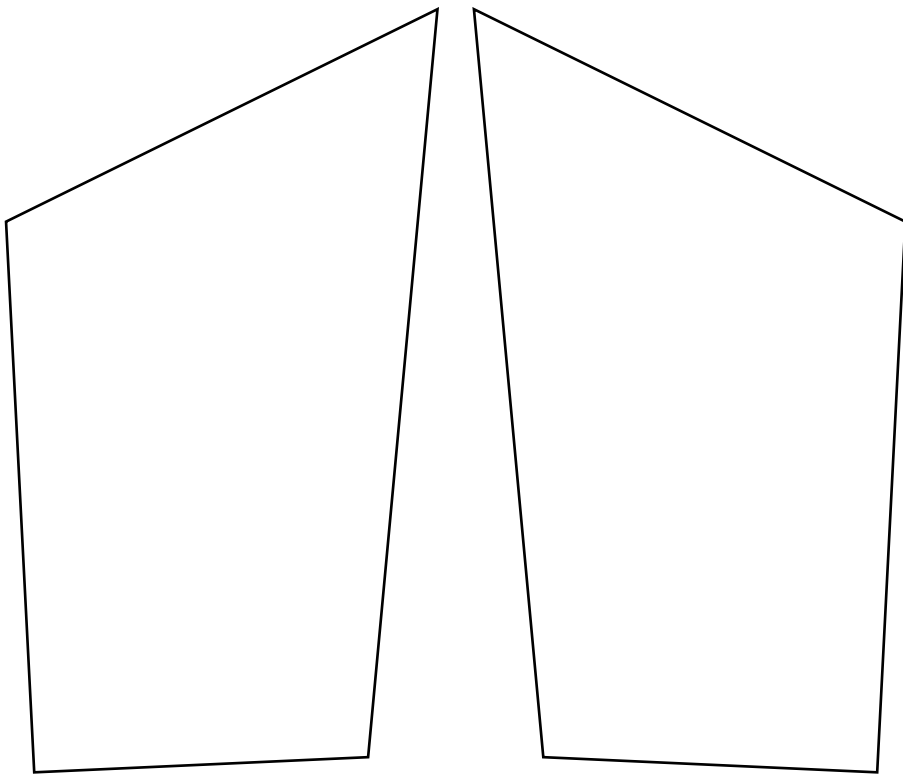

Here's a twist on the tabletop flower arrangement. Solder stained-glass petals and leaves to craft wire, then add decorative tendrils made of curling wire.

IN RANGE

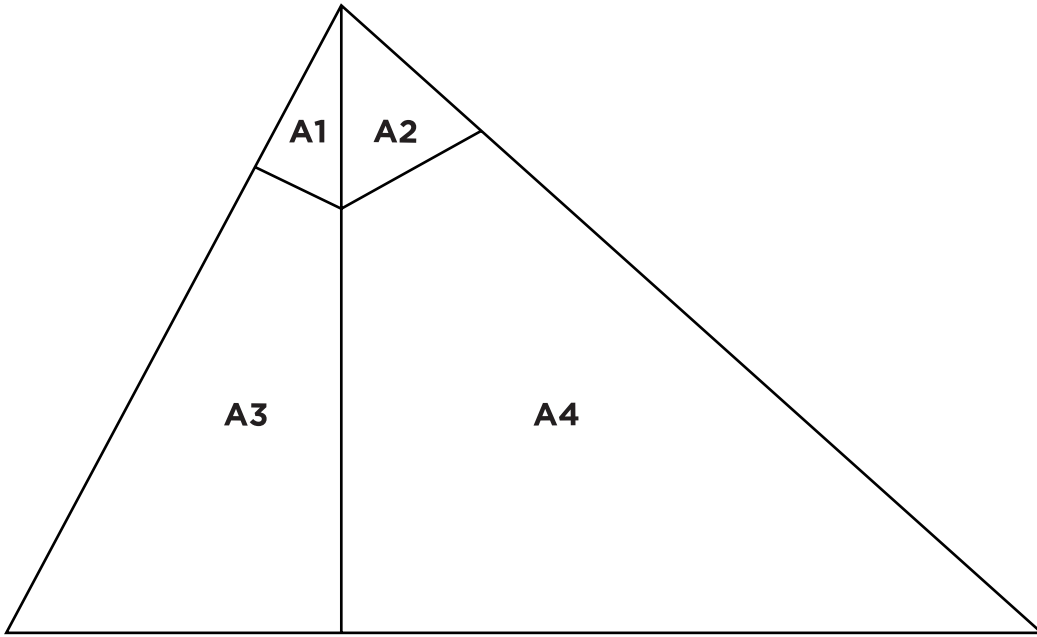

This trendy mountain-and-trees combo is on point and super easy to craft. Just solder the triangles together, joining the pieces at right angles. This will allow the creation to stand up on its own.

WING IT

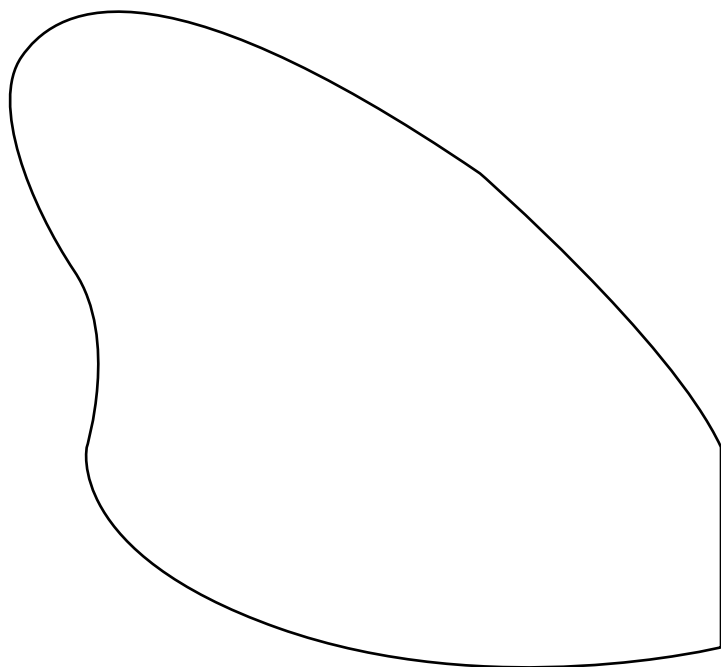

For a design that's full of dimension, sandwich little lovelies (like these leaves) between pieces of water droplet stained glass. This simple technique creates the look of something cast in resin with none of the measuring, mixing or mess.
