

SUBLIMATION IDEAS

*These trend-forward
DIYs are heating up!*

HOBBY LOBBY®

KITCHEN CLASSICS

When it comes to style in the kitchen, never throw in the towel! Sublimation's vibrancy is longlasting—even through messy clean ups and multiple washes, these lovely designs won't lose their color!

TO THE BRIM

Talk about sippin' pretty! A specialty mug press makes quick work of customizing mugs for any occasion. The best part? They're totally microwave and dishwasher safe.

TOTE-ALLY STYLISH

Sublimation is permanent—once the ink is heated, it becomes a part of the material it's applied to! For an A+ gift idea, embellish a sublimated tote bag with colorful stitching and a fluffy pom-pom.

GLITZ & GLAM

Here's an idea—personalize your pillows with the power of sublimation! This versatile process works on both smooth and textured surfaces, including this dazzling sequin pillow!

SUBLIMATION STATION

When it comes to mini projects (Exhibit A: these stylish hexagon coasters), a mini heat press is your best bet for easy maneuverability.

COASTER CHIC

No drink is complete without a pretty coaster underneath! Sublimation is a great choice for creating professional-quality, gift-worthy designs right at home.

GOT STYLE?

Before sublimating on a shirt, always check the fiber content. The higher the percentage of polyester in a fabric, the more vivid the color transfer will be! For bright, fade-resistant designs, use 95% polyester shirts.

PIECE BY PIECE

There are so many unique sublimation blanks to choose from—like ready-to-customize puzzles (sold in 6-packs!). Level up this classic rainy-day pastime with one-of-a-kind designs that speak to the creative in you.

KEEP 'EM COOL

Sublimation allows you to achieve sharp, bold designs without any cracking or peeling! While white items are optimal for sublimating, light-colored surfaces are also good candidates for this technique.

On the Cover: Sublimation is the pick-of-choice for achieving maximum coverage on any project, big or small—from pillows to blankets and everything in between!
