## Small Cylinder Vase

The Paper Crafts Department is filled with noteworthy embellishments that are perfect for glass projects! Keep wedding centerpieces under wraps by taping scrapbook paper around plain vases, or create an eye-popping, mouth-watering candy station with DIY vinyl monsters (on the cover).

## Bubble Ball Vase

For a bridal shower display that truly says, "I do," try brushing on acrylic chalk and metallic enamel paints (among the best paint for glass). Or adhere rows of silver mirror stickers to the vases for disco ball decorations!

## Sea Glass

With the right supplies, transforming a clear Sidney vase into faux sea glass is a breeze. Just spray on thin layers of sea glass finish and let it dry. Then tape a design inside of the vase, and trace it onto the exterior with glossy 3D medium!

## Vibe Bud Vase

Sometimes you want vases that sparkle (with pink glitter), and sometimes you want them to shine (with silver leaf). Either way, metal leaf adhesive is your friend—it holds perfectly on glass surfaces!

## Glass Etching

Look to etching cream to create that oh-so-special frosted-glass effect—like the leaf pattern on these hurricane vases. Just adhere stencils (these leaves are DIY'd from permanent vinyl) onto the glass before applying the etching cream.
